## **ABOUT THE ORGANIZATION**

**Sehgal Foundation** is non-government organization that designs and promotes rural development interventions that create opportunities, build resilience, and provide solutions with a vision that every person across rural India is empowered to lead a more secure, prosperous, and dignified life.

The foundation team works together with rural communities to create sustainable programs for managing water resources, increasing agricultural productivity, and strengthening rural governance. Sehgal Foundation's grassroots programs address three of rural India's most pressing and interrelated issues: water security, food security, and social justice.
