

04 - 06 October, 2023 at NIRDPR-NERC, Guwahati

This training programme is open to people who want to learn about rainwater harvesting (RWH) systems—the theory, practice, and policy. The course will share knowledge and holistic perspectives on rainwater harvesting and provide opportunity for hands-on planning for RWH systems in households, institutions, villages, and colony levels. RWH systems help in creating decentralized and sustainable sources of water supply and improve water availability. The training will equip participants for contributing to national water conservation efforts and mitigating India's looming water crisis.

TRAINING DURATION & DETAILS

It's a 3 day training programme from **04 – 06 October, 2023 at Guwahati**. This is a great opportunity for panchayat functionaries, government officials, students, civil engineers, architects, planners, NGO representatives, and entrepreneurs interested in learning and taking up RWH and water management as a profession. The training program will be an opportunity to interact with fellow participants to exchange experiences, news and views related to developments in the field of RWH.
